**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Halliday et al. '333.

There is disclosed in Halliday a cartridge 1 containing a beverage ingredient and being formed of an air and water impermeable material, the cartridge defining a storage chamber 9 containing the ingredients 8, a manifold chamber 6, the cartridge comprising an opening through which ingredients can be filled into the storage chamber, the opening being closed by a lid 3 having a first portion (outer periphery) overlying the manifold chamber and a second portion (inner area) overlying the storage chamber, wherein the first portion and second portion are ierceable to accommodate an inflow and outflow of liquid, a discharge chamber 37, a discharge spout 5, a partition dividing the manifold and storage chambers the partition having apertures 7. In regards to the claimed aperture sizes and number, Halliday appears to meet those limitations.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-29 are rejected under 35 U.S.C. 102(b) as being anticipated by EPO 638486.

There is disclosed in the European reference a cartridge 1, the cartridge defining a storage chamber 9 containing a beverage ingredient 8, a manifold chamber 6, an opening through which ingredients can be filled in to the storage chamber, the opening being closed by a lid 3 having a first portion (outer periphery) overlying the manifold chamber and a second portion (inner area) overlying the storage chamber, wherein the first and second portions are pierceable to accommodate an inflow and outflow of liquid, a discharge chamber 37 which is overlain by a third portion of the lid, a discharge spout 5, a partition dividing the manifold and storage chambers the partition having apertures 7, and a filter material 10.

In regards to the piercing of the lid and its location, such is functional without a positive recitation of a means to pierce.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Lazaris et al. '762 and Sargen et al. are cited for their disclosure of the state of the art.
